CHARACTERS		
APPEARANCE	White or almost white crystalline powder.	White crystalline powder
SOLUBILITY	Practically insoluble in water, freely soluble in acetone and in methylene chloride; sparingly soluble in ethanol (96%).	Conforms
IDENTIFICATION	A). By UV: The absorbance measured at 419 nm is NMT 0.10. B). By IR: The infrared absorption spectrum of the test sample is concordant to that of the standard. C). By TLC: Result A: The principal spot in each the chromatograms obtained with the test solutions is similar in position, and size to the principal spot in the chromatogram obtained with the corresponding reference solution. Result B: The principal spot in each of the chromatograms obtained with the test solutions is similar in position, colour in daylight, fluorescence in ultraviolet light at 365 nm and size to the principal spot in the chromatogram obtained with the corresponding reference solution, the principal spot in each of the chromatograms obtained with test solution (b) and reference solution (b) has an R _f value distinctly lower than that of the principal spot in each of the chromatograms obtained with the test solution (a) and reference solution (a). (D). The colour of solution is discharged and a clear solution remains. E). The test solution is yellow and the blank is red.	0.06 Conforms Conforms Conforms Conforms Conforms
